306 Low Pressure Hose, Fittings and Assemblies

Construction:

- *Inner Tube:* seamless synthetic rubber compound
- *Reinforcement:* single cotton braid
- *Outer Cover:* synthetic rubber cover

Operating Temperatures:

-65° to +160°F

Identification:

Black cover with linear yellow indicator stripe interspersed with symbol "LP"; hose manufacturer's code, size and date of manufacture (quarter year/year). Spaced 180° from this is "Aeroquip 306" in a white stripe. Markings repeated six inches apart.

Application:

Air or vacuum instrument systems, automatic pilots and lines to pressure gauges used with these systems as specified in MS33620. Hose assemblies conform to AN6270. Hose conforms to MIL-DTL-5593. Fittings conform to MIL-DTL-38726 and MS27404.*

* Supersedes AN773

306 Hose / MIL-DTL-5593

303, 302A Medium Pressure Hose, Fittings, and Assemblies

Construction:

- **Inner Tube:** seamless synthetic rubber compound
- **Reinforcement:** synthetic impregnated single-wire braid over single cotton braid
- **Outer Cover:** synthetic impregnated oil-resistant cotton braid

Operating Temperatures:

- 303 Hose: -65° to +250°F
- 302A Hose: -40° to +250°F

Identification:

Grey-black braided cover with linear yellow marking consisting of — "MIL-DTL-8794 ,size, date of manufacture (quarter year/year) and hose manufacturer's code." Spaced 90° from this is a yellow indicator stripe interspersed with "Aeroquip 303" or "Aeroquip 302A." Markings repeated nine inches apart.

Application:

Medium pressure hydraulic, pneumatic, fuel, oil and coolant systems specified in MS33620. Hose assemblies conform to MIL-DTL-8795 and MS28741. Hose conforms to MIL-DTL-8794. Fittings conform to MIL-A-5070 and MS24587.* Hose may be used in submerged applications.

* Supersedes MS28740, fittings dimensionally and functionally interchangeable.

303, 302A/ MIL-DTL-8794 Hose

* Use D instead of (-) after size for -8 and larger

Aircraft Rubber Hose Assembly Instructions

306, 303 and 302A Hose

Step 1.

Cut hose squarely to length. Use hose cut-off machine or fine tooth hacksaw. Do not remove the cover if using a hacksaw; wrap hose with several layers of tape before cutting.

Step 2.

Place socket in vise. Do not over-tighten vise on thin walled sockets of lightweight fittings. Screw hose counter-clockwise into socket until it bottoms. Back off 1/4 turn.

Step 3.

Tighten nipple and nut on assembly mandrel. The use of Aeroquip brand S1051 hand assembly tools are recommended to avoid damage to the sealing surface and to properly support the inner tube.

Step 4.

Lubricate inside of hose and nipple threads liberally. Use lubricating oil, petrolatum or light grease.

Step 5.

Screw nipple into socket and hose using wrench on assembly tool hex. Nut must swivel freely when assembly tool is removed. Maximum allowable gap between nut and socket is 1/16". On -32 screw in until turning becomes difficult, back out nipple, relubricate and reassemble.

Elbow Hose Assemblies - 303 and 302A

Step 1.

Cut hose squarely to length. Use hose cut off machine or fine tooth hacksaw. If using a hacksaw, wrap hose with tape before cutting. Do not remove cover.

Step 2.

Place socket in vises. Do not over-tighten vise on thin walled sockets of light weight fittings. Screw hose counter-clockwise into socket until it bottoms. Back off 1/4 turn.

Step 3.

Flange elbow fittings. Drop flange over threaded end of nipple. Nipple shoulder must fit into counter bore of flange.

Step 4.

Lubricate inside of hose and nipple threads liberally. Use lubricating oil, petrolatum or light grease.

Step 5.

Screw nipple into socket and hose using wrench on elbow hex. Tighten until hex is snug against socket. On -32 and larger sizes, screw in until turning becomes difficult, back out nipple, relubricate and reassemble.

Step 6.

Adjustments may be necessary to obtain the desired position angle between two elbows. In order to minimize backing off elbows to position, the following procedure should supplement Step 5.

- A. Tighten both elbows to maximum allowable gap (reference Step 6C), then start to position for relative angle between the elbows.
- B. Finish assembly by adjusting both elbows. Backing-off to position should be avoided and in no case should exceed 1/4 turn.
- C. Maximum allowable gap between nipple hex and socket is 1/16" using 303 and 302A hose.

Hose Cut-off Factors

Cut off factors shown below indicate difference (in inches) between Length "L" and Length "J" illustrated on sample hose assembly.

				HOSE DASH SIZE											
		HOSE	ASSEMBLY	-2	-3	-4	-5	-6	-8	-10	-12	-16	-20	-24	-32
Low Pressure	306	Flared Fittings	Straight Swivel to Straight Swivel	.80	.88	.94	—	1.08	1.34	1.44	—	—	—	—	—
Medium Pressure	302A 303	Flared Fittings	Straight Swivel to Straight Swivel	—	1.32	1.30	1.50	1.54	1.90	2.02	2.02	1.90	2.00	2.18	2.50
	302A 303	Globeseal Flareless Fittings	Straight Swivel to Straight Swivel	—	—	1.88	2.10	2.22	2.66	2.92	2.94	3.20	3.44	3.88	4.74

Rubber Hose Assembly Equipment

S1385 Hose Cutoff Saw

S1385 Features

- Low Cost
- Compact
- Easy Operation
- Bench-Mounted
- Built-in Safety Features
- U.L. Listed

Electrical Requirements

2 1/2 horsepower electric motor. 115V, single phase, AC-DC, 5-60 Hz, 5200 rpm.

Eaton's Aeroquip brand S1385 hose cutoff saw is compact and easy to operate. The spring arm is designed with an improved stabilizer to insure fast and efficient cutting of hydraulic hoses. The S1385 saw will cut single wire braid hoses through 1.25 inches and 2-wire braid hoses through 1 inch as well as textile hoses through 2 inches.

The S1385 cutoff saw is easily bench-mounted eliminating the need for a special stand. It is also equipped with a safety clutch to prevent motor damage in case of binding. The blade is well guarded and can easily be changed. See brochure AEB-262 for more details.

S1380 Hose Assembly Machine

Machine Specifications

Dimensions: 12" high x 34" long x 27" wide

Weight: 200 lbs. (approx.)

Hose Range: -3 (3/16") through -12 (3/4"), medium pressure -4 (1/4") through -12 (3/4"), high pressure

Motor Power: 1 horsepower

Electrical Requirements

230/460V, 3 phase, 60 cycle, 120V

Eaton designed the S1380 hose assembly machine to simplify and speed the assembly of hoses with standard screw together reusable fittings. The machine features a durable 1 H.P., 3-phase, 60 cycle electric brakemotor operating at 1750 R.P.M. The motor is "C" face mounted to a speed reducer which provides a working spindle with 58.3 R.P.M. . With the S1380 machine you can quickly assemble straight or elbow-type reusable fittings on medium pressure hoses in sizes -3 (3/16") through -12 (3/4") and high pressure hoses in sizes -4 (1/4") through -12 (3/4"). This hose assembly machine is simple to operate with an easily adjusted spindle lock for changing mandrels or operations and a carriage vise for accurate fitting assembly. The complete machine comes with two sets of chuck jaws, fire mandrels and operator's manual. See brochure AEB-257 for complete information.

FAILURE OR IMPROPER SELECTION, USE, OR ASSEMBLY OF THE PRODUCTS AND COMPONENTS FOR APPLICATIONS DESCRIBED HEREIN CAN RESULT IN POSSIBLE PROPERTY DAMAGE, PERSONAL INJURY OR DEATH.

This document and any other related information from Eaton® Aeroquip® or its affiliates and authorized distributors, provide product options for consideration by Users having technical expertise with these products. Due to the wide variety of applications and operating conditions for these products and components, the User is solely responsible for making the final selection of the products and ensuring that all performance, safety and warning requirements for the User's intended application are met. Eaton® Aeroquip® recommends that Eaton® Aeroquip® hose, fittings or assembly equipment must be used only with other Eaton® Aeroquip® hose, fittings or assembly equipment, and Eaton

Aeroquip and/or its affiliates disclaim any obligation or liability (including all incidental and consequential damages) to the extent Eaton® Aeroquip® hose, fittings or assembly equipment is used with any other manufacturer's hose, fittings or assembly equipment or in the event that Eaton® Aeroquip® recommended processes and product instructions for hose assemblies are not followed. The products described herein, including product features, specifications, designs, and availability are subject to change at any time without notice.
