

Aeroquip®
1817 Series Ball Bearing Swivel Joints

Powering Business Worldwide

Table of Contents

Features and Capabilities.....3

3000 PSI Swivel Joints with Flared and Flareless Ends 3 – 5

3000 PSI Swivel Joints with Beam Seal Ends6

4000 PSI Swivel Joints with Beam Seal Ends 7

Eaton's Aeroquip 1817 series ball bearing plane swivel joints are qualified to MIL-J-5513C for dependable 3,000 psi (20,684 kPa), 4,000 psi (27,579 kPa) and 5,000 psi (34,475 kPa) service. Eaton engineers have designed these swivel joints to provide exceptionally long trouble-free service.

Design features include:

- Ball bearings minimize torque and maximize service life
- Stainless steel material minimizes envelope size and maximizes strength
- Titanium material reduces weight
- Dust seal excludes grit contamination which protects the ball bearings and seals for increased service life
- Less than 5 psi (34,475 kPa) pressure loss through straight configuration at rated flow

Eaton's Aeroquip ball bearing plane swivel joints may be used with hose assemblies to prevent binding or twisting of the hose and to provide a flexible joint in rigid lines. These low profile swivels are available in -4*, -6, -8, -10, -12, and -16 sizes with flared, flareless and Beam Seal ends.

** The -4 size was subjected to 5,000,000 endurance test cycles beyond MIL-J-5513C qualification requirement for a special helicopter rotor head application. Test report is available upon request.*

Design Data

Service: Swivel joints shown are for MIL-H-5606 and MIL-H-83282 hydraulic fluid. Swivels are available for Skydrol applications and any fluid or gas compatible with available seals.

Material: Corrosion resistant steel, titanium

Pressures (room temperature):

Pressure (psi/kPa)			
Operating	3,000/20,684	4,000/27,579	5,000/34,475**
Proof	4,500/31,026	6,000/41,370	7,500/51,711
Min Burst	7,500/51,711	10,000/68,948	12,500/86,184

*** Class 5,000 available on request. Please contact Eaton's Aerospace Group in Jackson, Michigan.*

Temperature Range: - 65°F (-54°C) to +275°F (+132°C)

Qualification: MIL-J-5513C, Type II,
Class 3000 psi (sizes 4-16)
Class 4000 psi (sizes 4, 6, -10, -12)
Class 5000 psi (sizes 6-12)

Engineering assistance is available to solve specific installation problems with special mounting provision, tube end configurations and seal combinations.

The swivel joint can be designed as an integral part of a hose assembly which increases reliability by reducing the number of potential leak points.

Whatever the requirements are for an 1817 series ball bearing plane swivel joint, or any other type of flexible fluid line connection, contact Eaton's Jackson, Michigan facility.

Flared Ends

AS4395

AS4396

Flareless Ends

AS33514

AS33515

Beam Seal Ends

AS4207

AS4208

Other configurations available upon request.
