PERSONAL BREATHING EQUIPMENT

Saywell International are an authorised distributor for **Essex PB&R Corp.**

Essex PB&R offers an assortment of protective breathing equipment for private and commercial airline pilots and crew, corporate/ executive/ commercial passengers, homeland defence, law enforcement, first responders, victim rescue, emergency building evacuation, and household protection.

With only **six** donning steps, the Essex PBE is fitted in seconds and is the **quickest donning PBE** on the market. It is also the lightest (up to 1 ½ pounds lighter than competitors PBE's) and one of the smallest on the market. It can be stowed in a combination of stowage options with mounting brackets designed for minimal stowage space and rapid dispensing. The Essex PBEs are the only PBE's that do not need volatile & difficult to transport oxygen generators as air is supplied through compressed aviation grade oxygen bottles with over-pressure protection to prevent accidental rupture.

Essex PBE Benefits

- Lightest stowage weight (up to 17% lighter*)
- Lightest weight when worn (up to 43% lighter*)
- Smallest storage space (up to 36% less space*)
- Many different stowage options
- Uses compressed gas not volatile oxygen generators
- Quickest donning during FAA flight attendant fire fighting tests (66% quicker*)
- Better visibility (up to an 80% greater field of view*)

Essex Pilot Benefits

- For use with pilot oxygen masks
- Lightweight
- Resists high heat, flames & fumes
- Portable & compact
- Does not interfere with tower or crew communication
- Provides full mobility & 360-degree visibility
- Dons & doffs in seconds
- One size fits all
- Perfect protection for military aviation and business aviation (pilot & co-pilot)

Essex SCU Benefits

- Up to 60 minutes of protection
- Dons & doffs in seconds
- Resists high heat, flames & toxic fumes
- Portable and compact
- Allows for clear two-way communication
- Provides full mobility & 360-degree visibility
- Requires no special fitting.
- Provides decompression protection
- FAA approved technology
