

BAE JETSTREAM 31 & 32

SPARES SUPPORT

BAE SYSTEMS have appointed **Saywell International** to be their sole distribution centre for Jetstream 31/32 spares. Saywell assumes responsibility of spares support for the aircraft type from 4 February 2008.

This spares support agreement utilises our expertise and experience in after market aerospace support and consolidates **BAE SYSTEMS** entire global inventory of J31/J32 spares in to our UK 155,000 sq. ft. head office.

With warehousing in the USA, regional offices in Canada and Singapore, 24 hour AOG support and our commitment to deliver a world class service, operators of J31/J32 will benefit with competitive pricing and enhanced service.

the parts people

Saywell International is one of the largest and most experienced global spares support centres in the world, supplying the world's Aerospace Industries and Operators for over 60 years.

We have direct distribution agreements with many leading aircraft component manufacturers, vast inventories on many commercial aircraft types, and a fully CAA & Eaton approved aerospace hose manufacturing workshop which combine to enhance our commitment to improving aerospace spares support worldwide for every market sector.

The Jetstream 31 and 32 support agreement with BAE SYSTEMS succeeds a similar, very successful arrangement with the BAE 748 aircraft. Our development and dedicated support of this aircraft has gone from strength to strength. We hold the most comprehensive spares inventory in the world for this aircraft and our goal is to develop the J31 and J32 spares support on an equal scale.

We constantly monitor the spares market, stock movement and invest in dedicated inventory. So, you can be assured we will have the parts you require when you have demand.

For the J31 and J32 operator, this signifies that you will have a supplier totally committed to offering absolute support for your aircraft. In addition, due to the diversity of the aircraft we support and cater for, there maybe a possibility to provision for your entire fleet, possibly becoming your most favoured source.

Saywell International are truly **the parts people**.
